

PTEC Research on Valuation of Ecosystem Services

Jeffrey R. Vincent

Duke University / Beijer Institute / SANDEE / EEPSEA

Cape Town, October 27, 2013

Potential research topics on regulating services

1. Empirical performance of different valuation methods
2. Impact of institutional context on service values
3. Ecological and social variation in values in across space (and time)
4. Valuation in the presence of ecological thresholds
5. Scaling up to a relevant accounting level
6. Welfare-based valuation vs. valuation based on SNA principles

No externalities

Positive externality present
