Webinar Summary

Green jobs assessment models: INPUT -OUTPUT Analysis

The webinar exposes you to a very simplified way to measure the impact of green sectoral production initiatives. We will briefly discuss the Input-Output methodology and show you an example of how to carry out such an exercise using a recent country example. This webinar will benefit students and researchers who do not have any knowledge or skills in this methodology.

Webinar Format

30 Minutes presentations by each speaker. *(All times are Central Africa Time, CAT)*

10 minutes of Q&A at the end of each presentation.
